ABSTRACT

System-wide data on student retention and attrition prepared by the Central Staff Office of Institutional Research for the State University of New York is presented, with minimal narrative. Attrition/retention information is reported as of the fall 1978 semester on: (a) five cohorts of first-time, full-time students in baccalaureate programs; (b) four cohorts of full-time transfer students in baccalaureate programs; (c) three cohorts of first-time, full-time students in associate degree programs; and (d) two cohorts of full-time transfer students in associate degree programs. Part One provides a flow chart on attrition, retention and degree recipients of the class of 1977 (for those students entering as first-time, full-time in baccalaureate and associate degree programs). Part Two contains individual institutional tables depicting the history of first-time, full-time students in baccalaureate programs entering fall 1973 through fall 1977, measured retrospectively as of the fall 1978 semester. Part Three presents information by institution on the history of first-time, full-time students in associate degree programs entering fall 1975 through fall 1977, measured retrospectively as of fall 1978 semester. Part Four presents individual institutional tables containing information on the history of full-time transfer students in baccalaureate programs. Part Six tabulates selected trends in attrition/retention by institution and institution type. The appendix contains a publication list of the Central Staff Office of Institutional Research and Analytical Studies. (LC)

PART SEVEN - APPENDIX

Publications List. 219

INTRODUCTION

This report, prepared by the Central Staff Office of Institutional Research and Analytical Studies, presents system-wide information on student retention and attrition. This publication presents the results of an expanded survey of Attrition/Retention administered by this office in the Spring of 1979.

Due to an increasing interest in and need for more current and comprehensive attrition/retention statistics an expanded survey was designed by this office. In addition, the format of the survey instrument was designed to collect data similar to that previously collected so as to maintain comparable trend statistics. Previous reports on Attrition/Retention issued by this office (see Publications List in the Appendix) presented retrospective data (five years later for baccalaureate or three years later for two-year programs) on the cohort survival statistics of an entering cohort of first-time, full-time students in baccalaureate or two-year programs. This report presents attrition/retention information as of the Fall 1978 semester on: (a) five cohorts of first-time, full-time students in baccalaureate programs; (b) four cohorts of full-time transfer students in baccalaureate programs; (c) three cohorts of first-time, full-time students in associate degree programs, and (d) two cohorts of full-time transfer students in associate degree programs. The expansion in the number of cohorts included allows one to examine changes in the rates of attrition among the cohorts without having to wait, as in previous reports, a full five years (for baccalaureate program cohorts) or a full three years (for associate program cohorts). The inclusion, for the first time, of cohorts of full-time transfer students allows one to compare the rates of attrition between first-time and transfer students.

The factors of significant consequence in the development of a student's academic career and plans are varied and diverse; consequently, there are innumerable questions that may be asked regarding student attrition and retention. Any study which involves the tracking of individuals over a period of time tends to be time-consuming and complex. Because of the desirability of designing a study that would yield significant information and still be capable of execution in a reasonable period of time, the questions formulated for purposes of this study have been restricted to those which could be answered by an examination of permanent records and transcripts. Within these restrictions, this study was designed to answer some fundamental questions, e.g., Of the groups examined, how many received awards and how many did not? Of those that received an award, when did they receive it in terms of normal expectations? Of those that did not receive an award, how many were still enrolled? Of those that were no longer enrolled, how long did they attend the institution? In the case of associate degree programs, how many of those who received an award or did not receive an award and were no longer attending, transferred to another college? More detailed information on the design and assumptions of the study will be found in the section titled "Methodology".

The accumulation of the information contained in this study involved a great deal of work on the part of individual campuses. We appreciate the cooperation and effort that went into providing these data. We would like to particularly thank our statistical staff of Mr. Roy Spoor, Mrs. Elda Gorden, and Miss Susan Bossoni for their efforts in preparing the statistical information in the report and Mrs. Vikki Mazzone who was responsible for the typing and mailing of the survey to the campuses. Finally a thank you to our typing staff of Mrs. Doreen DeCrescenzo, Mrs. Dorothy Jegier and Mrs. Peggy Sluus who prepared the manuscript for publication.

METHODOLOGY

The problem of "measuring" student attrition and retention in an instructional program is complicated by a number of factors - some technical and some conceptual. Among the latter is the fundamental problem of defining the concept of attrition in an operationally significant manner. Regardless of its original meaning, the term 'attrition' as it is used within the context of higher education involves the concept of failure to achieve some goal or objective. It would, consequently, be improper to include within attrition figures a student who entered an undergraduate college and completed only one year of study if that student had no commitment to a program of study leading to a formal degree, or no commitment to a specific goal which was not achieved.

The basic approach utilized in this study was to identify each Fall a group of full-time students enrolled in a degree program - called the "total cohort" - and to arrive at attrition/retention information by tracing the flow of the cohort through the institution. The reason for selecting a cohort of full-time students enrolled in a degree program was that they, by virtue of their enrollment, expressed a commitment to definable objectives. Specifically, they were committed to (i), full-time study and (ii) attaining a degree. This study is organized so as to provide information regarding the relative success of the cohort in achieving their goals.

The study examines the flow of: (i) those students enrolled in bachelor degree programs, and (ii) those students enrolled in associate degree programs. If comparisons are made between the two cohorts, a word of caution is advisable. It should be remembered that a student who enrolls in a bachelor's degree program and leaves the institution after two years without a degree will be counted as failing to achieve his objectives, whereas a student enrolled in an associate degree program who receives a degree will have met his objectives. Yet, both students may have completed essentially the same course work and performed at essentially the same level of competence. Since a four-year institution does not give a formal degree for completing two years of study while a two-year institution does, comparisons between the two cohorts with respect to ability and achievement should be made with caution.

Attrition/retention data in bachelor's degree programs are based on full-time, first-time students who entered in Fall 1973, Fall 1974, Fall 1975, Fall 1976 and Fall 1977 and on full-time transfer students who entered in Fall 1974, Fall 1975, Fall 1976 and Fall 1977. Each cohort was divided into those who received a degree, thereby achieving their baccalaureate educational objectives, and those who did not receive a degree. Of those who did not receive a degree the number still persisting/still enrolled, either part-time or full-time, in the institution were reported. For those who left the institution without a degree the period of the last enrollment was reported. Degree recipients were also reported in terms of the conventional four-year time frame, i.e. those graduating early, four years after admission, or later. All data were collected as of the end of the Fall 1978 semester, therefore, for the most recent cohorts examined there have not been four years of elapsed time so many students will be reported as persisters/still enrolled.

It would be incorrect to infer that students who are no longer enrolled have abandoned their educational objectives. They may or may not have abandoned their original goals. All that is known for certain regarding the students who are no longer enrolled is that, for reasons which we do not have, their relationship with the institution has ceased. Again, a cautionary note, the reasons for leaving the institution may be many and various, e.g., financial, academic, abandonment of original objectives, illness, desire to attend another institution, or any variety of personal and non-personal reasons. Consequently, inferences made from the data regarding students no longer enrolled should be made with caution. In general, this method of organization yields an accurate picture of student flow which is easily scanned. In addition to providing information regarding attrition/retention percentages, it also indicates for each institution the period during which the greatest attrition took place for that entering class.

Attrition/retention data in associate degree programs are based on full-time, first-time students who entered in Fall 1975, Fall 1976 and Fall 1977 and on full-time transfer students who entered in Fall 1976 and Fall 1977. The divisions of each cohort are similar but not identical to the divisions utilized for bachelor's degree students. Consequently, the same cautionary notes apply. The major difference in the case of the associate degree programs is that additional information is provided regarding the number and distribution of students who transferred to another college. This additional information was sought in the case of the associate degree programs since many of these programs are designed to be university parallel programs leading to transfer to another institution.

In interpreting the data for attrition in associate degree programs, it should be noted that those students whose ultimate objective is to receive a bachelor's degree may, because of limitations on the transferability of credits and other factors, perceive it to be in their best interest not to complete the associate degree program. Consequently, some students may not receive a formal award in a two-year program by prior design. In this instance, therefore, attention should be given to the students who do not receive an associate degree but do transfer to another college.

All of the institutions of the State University of New York which had students meeting the conditions for inclusion in the study were asked to respond to the survey. Several institutions were completely unable to respond and these institutions are noted by name in summary tables on the report. Several other institutions were unable to report completely. The data they sent back to us are incorporated where possible. Again, these institutions not completely responding are noted in the text of the report.

SUMMARY OF DATA

This is the fourth report presenting the results of the Office of Institutional Research and Analytical Studies' system-wide studies of Attrition/Retention (see Publications List in the Appendix). These studies have been conducted for the past five years and trend statistics from these studies have been gathered and are included in this report in four tables in Part Six on pages 167-188.

The flow chart format used in our previous reports comprises Part One, Sections A and B, of this report. These flow charts depict the attrition, retention and degree recipients of the Class of 1977 (for those students entering as first-time, full-time in baccalaureate and associate degree programs). Data included in this section of the report are reported five plus years after initial enrollment for baccalaureate students and three plus years after initial enrollment in associate degree programs. New formats for presenting data are presented in the remaining sections of the report.

Part Two contains individual institutional tables depicting the history of First-time, Full-time students in Baccalaureate Programs entering Fall 1973 through Fall 1977 measured retrospectively as of the Fall 1978 semester.

Part Three presents information by institution on the history of First-time, Full-time students in Associate Degree Programs entering Fall 1975 through Fall 1977 measured retrospectively as of the Fall 1978 semester.

Part Four presents individual institutional tables containing information on the history of Full-time Transfer students in Baccalaureate Programs entering Fall 1974 through Fall 1977 while Part Five presents information on the history of Full-time Transfer students in Associate Degree Programs entering Fall 1976 and Fall 1977. All of the cohort data presented in Parts Two through Five are given as of the Fall 1978 semester. These data will be updated as of later Fall terms in future reports on the history of these cohorts.

Part Six of the report contains selected trends in Attrition/Retention by institution and institution type. As previously mentioned, the first four tables present statistics gathered about graduating classes after their date of graduation. The remaining eight tables by institutional type and by institution present the history of the cohorts examined in the study as of the Fall 1978 semester. These tables are particularly useful to those persons who wish to examine changes in attrition/retention rates in a more timely although not final manner.

An examination of the data for the Class of 1977 Baccalaureate Programs, indicate that the percentage of degree recipients has increased at each type of institution compared to the previous year. Overall, 54.5 percent of the cohort examined received a bachelor's degree. There were a few exceptions at

the individual institutional level. The highest competion rates (degree recipients) were reported by the Statutory Colleges (74.3 percent).

Type of institution	Percent Baccalaureate recipients[a]	
	Class of 1976	Class of 1977
All institutions	50.8	54.5
University Centers	54.3	60.0
University Colleges	47.3	49.2
Specialized Colleges	55.9	63.0
Statutory Colleges	67.9	74.3

[a]Percent of the Cohort of First-time, full-time students in Baccalaureate Programs Classes of 1976 and 1977 who completed a bachelor's degree.

An examination of the data reported for the Class of 1977 Associate Degree Programs indicate that the percentage of degree recipients has also increased at the one Health Sciences Center included, the Community Colleges as an institutional type, and the Agricultural and Technical Colleges (with one exception) compared to the previous year. Please refer to pages 39-81 of this report for specific information.

Data on selected cohorts of students entering as full-time transfer students are included for the first time in this report. These data seem to indicate that transfer students in Baccalaureate Programs are more likely to complete a degree than first-time students entering at the same time. Additionally, these transfer students appear to have a significantly larger first year attrition rate than that reported in the second and subsequent year. First-time students in Baccalaureate Programs, on the other hand, have shown higher attrition rates for the first two years before the Fall of their second and third years.

Examination of these initial data for the cohorts of full-time transfer students in Associate Degree Programs indicates that transfer students at the associate degree level show attrition, completion and persistence patterns similar to those of first-time students at this level of study.

COMPARISON OF SELECTED CHARACTERISTICS OF ATTRITION/RETENTION OF FIRST-TIME AND TRANSFER STUDENTS IN 1974 BACCALAUREATE AND 1976 ASSOCIATE DEGREE COHORTS[a]

Entering Cohorts	Degree recipients as of Fall 1978	Non-degree recipients enrolled in Fall 1978	Non-degree recipients who left before Fall of their	
			Second year	Third year
1974 Entering Baccalaureate Cohorts				
First-time	45.5%	9.1%	16.6%	17.4%
Transfer	66.4%	1.5%	17.9%	9.0%
1976 Entering Associate Degree Cohorts				
First-time	43.3%	14.3%	18.2%	10.7%
Transfer	38.7%	12.7%	17.7%	11.1%

[a]These cohorts were selected as they represent the first year that both First-time and Transfer Cohort information were collected. Please see Tables E, G, I, K of this report (Part Six) for more complete information about these cohorts.

Due to the facts that: (a) much of these data were collected for the first time in this study and, (b) several institutions were unable to complete the survey, the reader is encouraged to examine each table carefully before interpreting these data.

As previously mentioned, Parts Two through Five of this report and Tables E - L of Part Six present information collected for the first time on several cohorts of full-time first-time and transfer students. Data on these cohorts, collected as of the Fall 1978 semester, permits one to examine attrition, retention, completion and persistence patterns without having to wait five years plus (for baccalaureate programs) or three years plus (for associate degree programs). Examination of these data for baccalaureate programs indicate that the first year attrition rates of both the first-time and transfer students have increased slightly for cohorts entering Fall 1974 through Fall 1977. The first year attrition rates for the 1974 entering cohorts of first-time and transfer students were 16.6% and 17.9%, respectively, while the first year attrition rates for the 1977 entering cohorts, were 18.6% and 22.3%, respectively. The findings on first year attrition rates for associate degree programs are mixed. For first-time cohorts, the Agricultural and Technical Colleges indicate a reduction in the first year attrition rate from 20.8% for the cohort entering in 1975 to 17.8% for the cohort entering in 1977. The Community Colleges first year attrition rates for 1975 and 1977 are both 20.8%.

In examining the data for the first year attrition rates for transfer students in Associate degree programs, the Agricultural and Technical Colleges reporting indicate an 11.7% rate for cohorts entering 1976 and 1977 while the Community Colleges report an increase in first year attrition rates of 18.6% and 23.3% for cohorts entering 1976 and 1977, respectively.

Due to the lack of complete responses from several associate degree institutions, the reader is encouraged to examine the data for each institution separately in order to determine trends.

PART ONE -- CLASS OF 1977

Fall 1973 first-time, full-time students in a bachelors degree program
Number: 547
GROUP A
Bachelors degree recipients
Number: 390
% of cohort: 71.3
GROUP B
Awarded *before* Fall 1976
Number: 19
% of cohort: 3.5
% of A: 4.9
GROUP C
Awarded *after* Summer 1976 but *before* Fall 1977
Number: 336
% of cohort: 61.4
% of A: 86.2
GROUP D*
Awarded *after* Summer 1977
Number: 35
% of cohort: 6.4
% of A: 9.0
GROUP E
Those not receiving a bachelors degree
Number: 157
% of cohort: 28.7
GROUP F
Those enrolled full-time or part-time in Fall 1978
Number: 9
% of cohort: 1.6
% of E: 5.7
GROUP G
Those not enrolled in Fall 1978
Number: 148
% of cohort: 27.1
% of E: 94.3
GROUP H
Those whose last attendance was *before* Fall 1974
Number: 52
% of cohort: 9.5
% of G: 35.1
GROUP I
Those whose last attendance was *after* Summer 1974 but *before* Fall 1975
Number: 36
% of cohort: 6.6
% of G: 24.3
GROUP J
Those whose last attendance was *after* Summer 1975 but *before* Fall 1976
Number: 33
% of cohort: 6.0
% of G: 22.3
GROUP K
Those whose last attendance was *after* Summer 1976 but *before* Fall 1977
Number: 14
% of cohort: 2.6
% of G: 9.5
GROUP L
Those whose last attendance was *after* Summer 1977 but *before* Fall 1978
Number: 13
% of cohort: 2.4
% of G: 8.8

*Includes any who have met all requirements and are merely awaiting the next commencement.
